SEPSIS MANAGEMENT

Acurity's subject matter experts develop comprehensive contract portfolios that include high-value contracts with quality suppliers of products and services that can help members diagnose, treat, and manage challenging disease states. Acurity's Sepsis Management Contract Portfolio offers members cost-efficient solutions that address the critical stages of sepsis management, including prevention, diagnostics, and treatment.

Ranked **among the four most costly conditions** in the hospital for all four payer groups: Medicare, Medicaid, private insurance, and uninsured.

An **average hospital stay for sepsis costs approximately double the stay** for another diagnosis, and the **annual growth rate for hospital sepsis costs is three times the rate for hospital costs overall.**

Sepsis patients **stay in the hospital 75% longer** than other patients.
